#### **About FMC**

FMC was established in the UK in 1991 with a specific goal to supply products to the equipment manufacturers in the earthmoving and mining equipment industry. The company specialises in the field of wet friction materials and its products, which include sintered metallic, advanced friction paper, carbon, molybdenum, graphite and steel counter plates are used in a wide variety of heavy duty transmissions, clutch, differential and brake applications.

FMC's strategy is to continually strive to understand the changing needs of its markets by researching, developing and ultimately introducing new friction materials to meet the ever growing demand from its customers. This includes constant dynamometer testing of new friction material qualities, investments in the latest technology and working with clients in developing bespoke vehicle and machinery solutions.
